Installation

1. Inspect your divider set to ensure that all required parts have been included in the package. Refer to this sheet to find the contents list for your specific case model.
2. The configuration of the dividers within the divider base is customizable to fit your particular items. Refer to this sheet for drawings of the standard layout.
3. Fold all four sides of the base upwards. Attach the corners of the base sides with the hook and loop fastening system.
4. After you have decided on your preferred configuration of the dividers begin by installing the longest dividers. To aid with installation, a piece of loose paper can be positioned between the dividers and the base. Once positioned, remove the paper to attach the hook and loop fasteners. Continue by placing the smaller dividers into position.
5. Once the dividers have been put in place the divider kit can be installed into the case.
6. Complete the installation by installing the convoluted foam in the top of the case.

Care

If the padded divider set needs to be cleaned, a soft damp cloth with mild soap should be used. Tough stains may require the use of a spot stain remover.
